

Proposal for Final Project

House Hunting

Eve Kung

Statement of Intent

An app to help me track pink Queen Anne houses in San Francisco.

If you been to SF, you would notice the vareity of architecture the city beholds.

I'm obsess with the decorations different home types embraces.

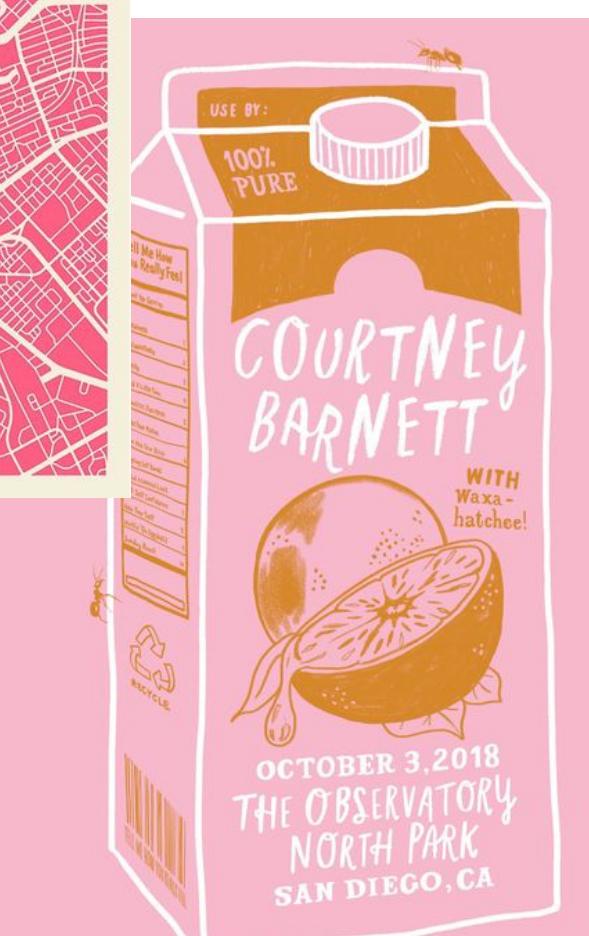

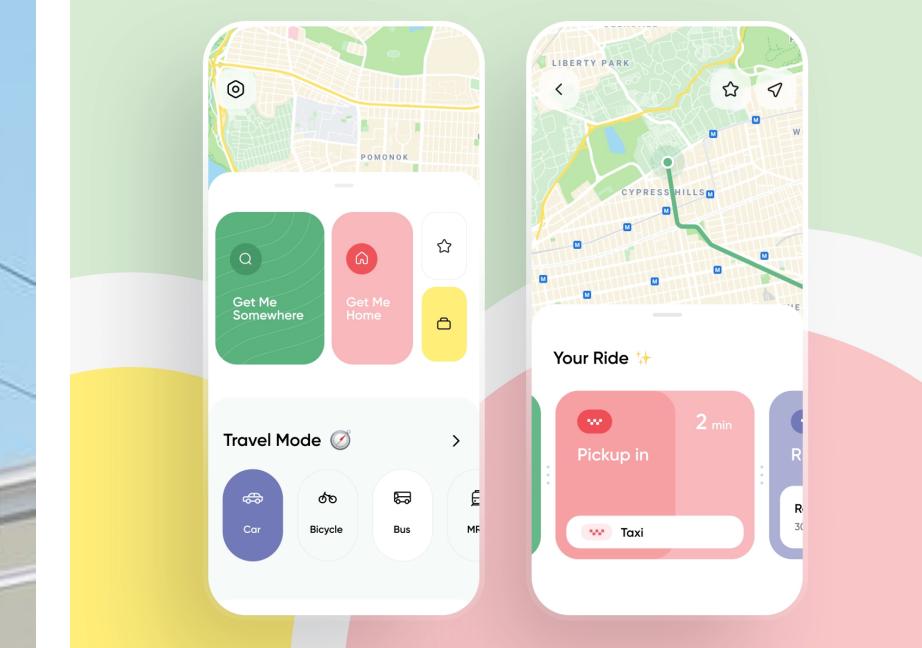

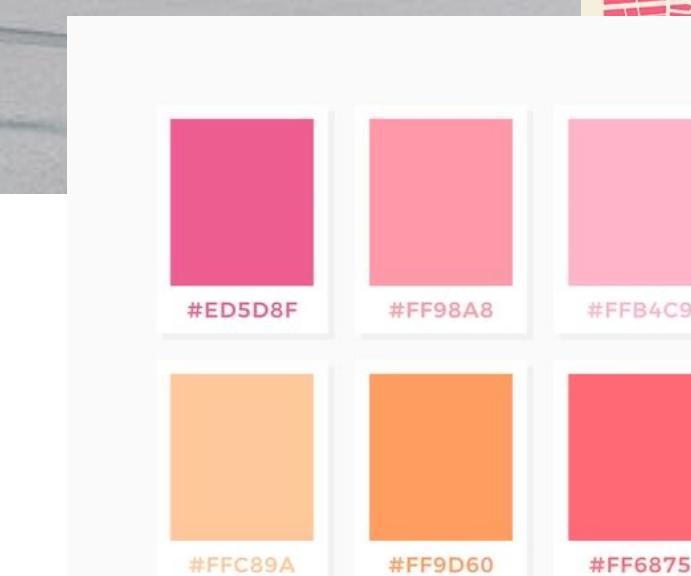

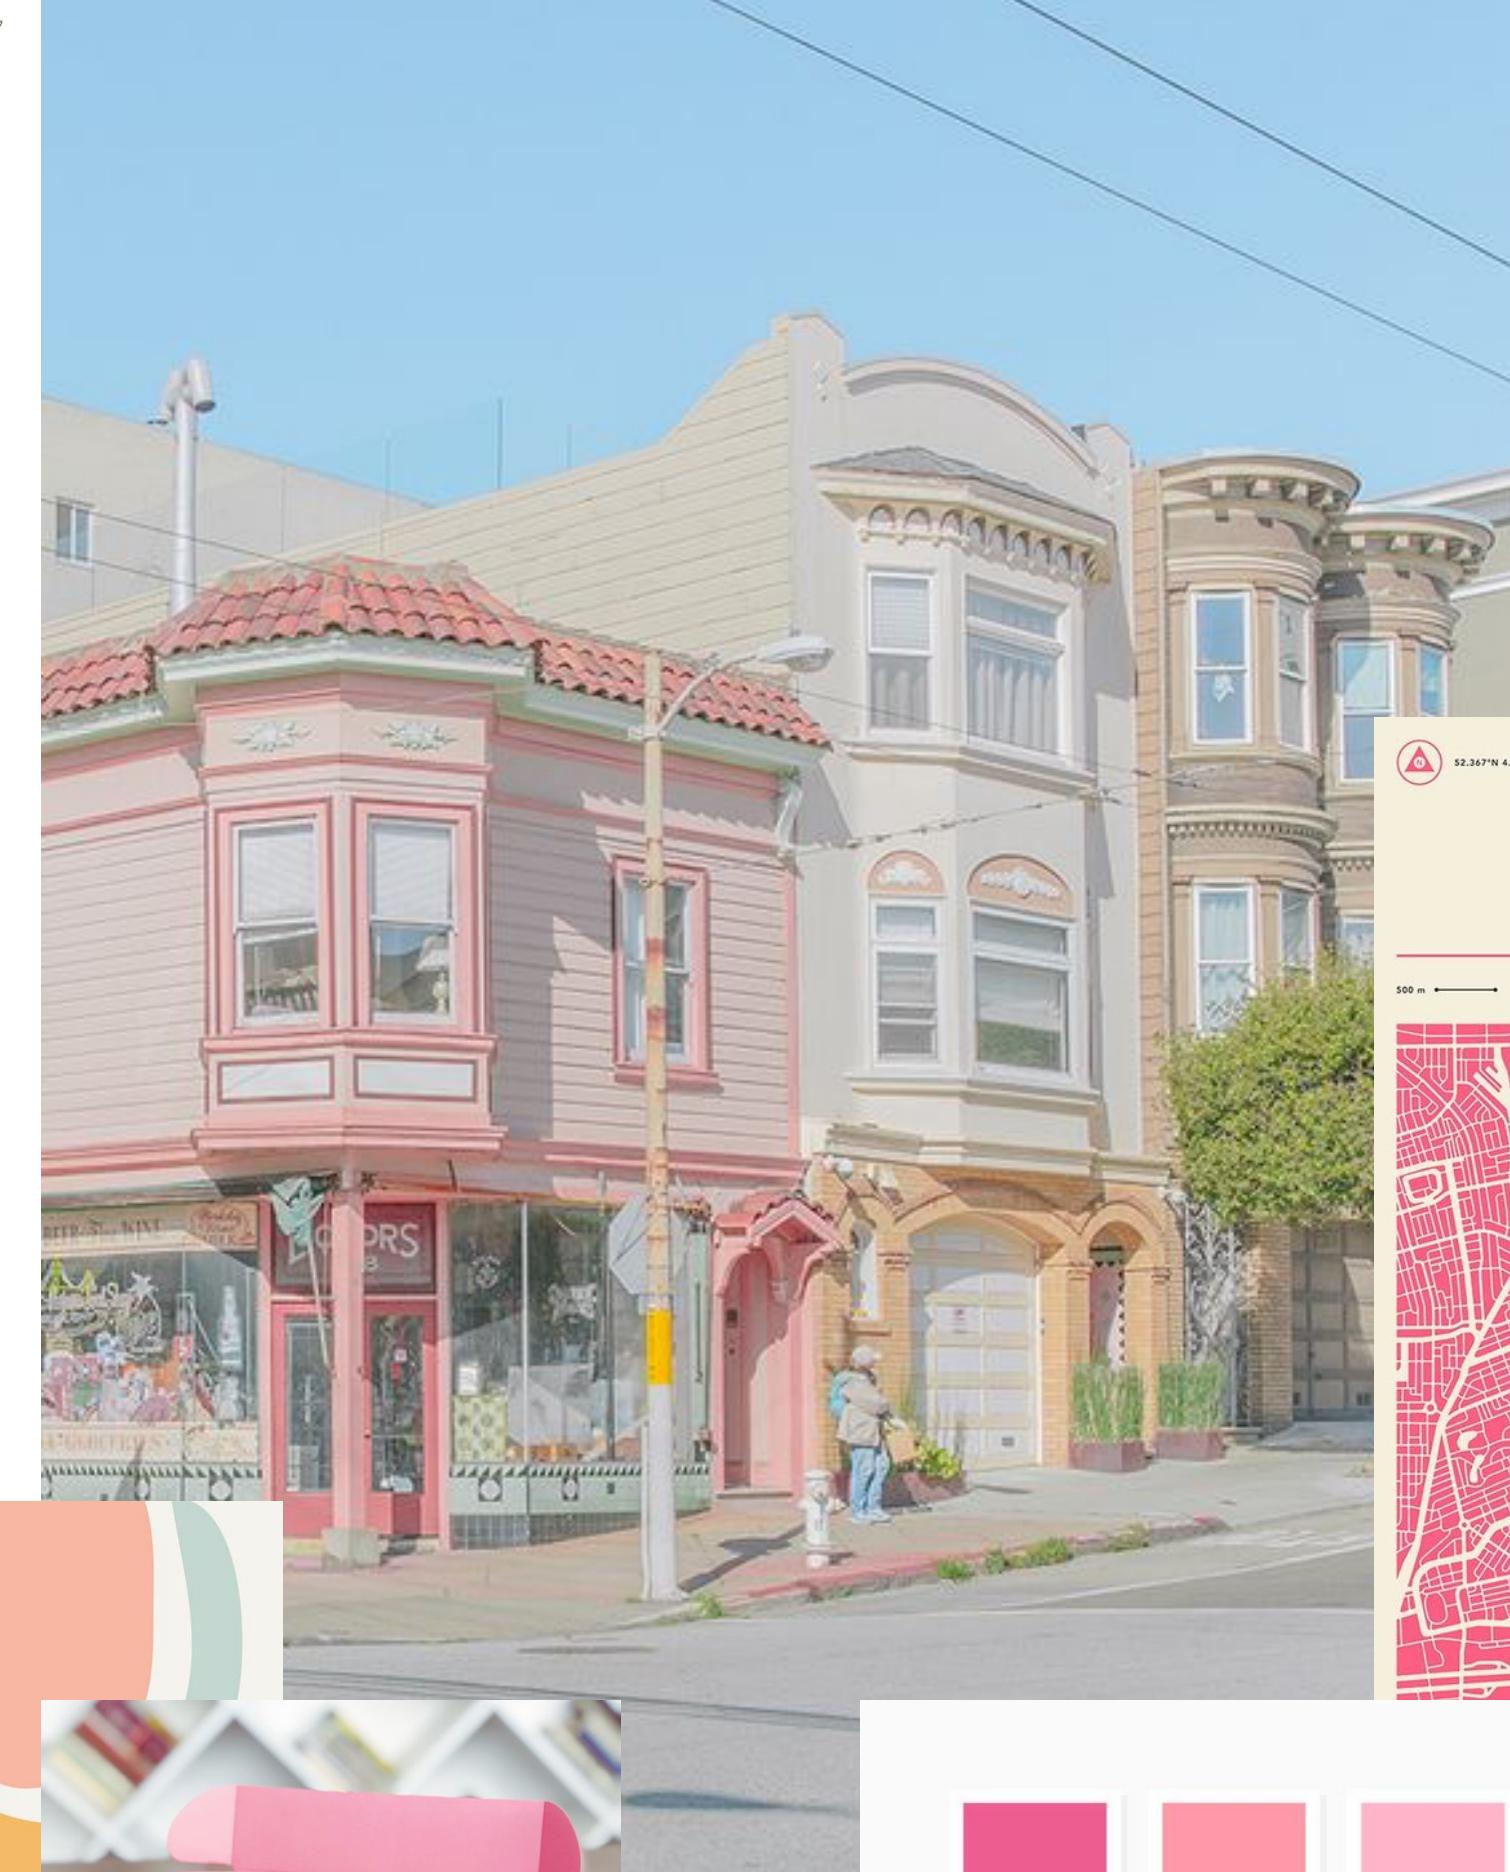

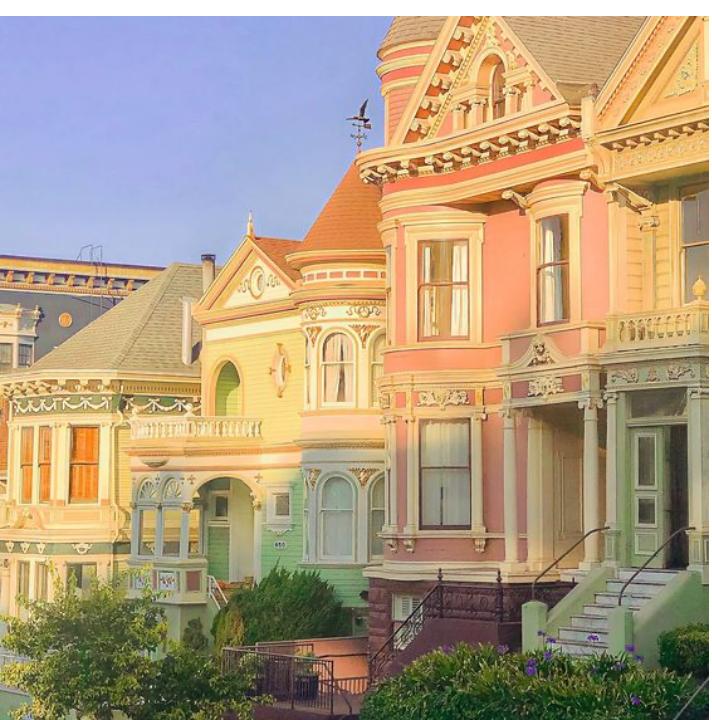

When I walked on the streets of San Francisco for the very first time, I was dazzled by the creative, beautiful and flashy houses.

Whether it's seeing Edwardian houses with light colors, simplistic details; or passing by the Castro Theater which feels like walking into a romanticized vision of early California; or even living in a Rousseau "Storybook" Home myself, I love the experience of roaming through the city and observe different architecture.

While I've been the most obsess with Queen Anne style houses, I want to use the app to track these kind of architecture that has pink on its exterior decor.
